

SLIDING TANK FRAME FOR JOHN DEERE 8R 2011

AUSTRALIAN BUILT FOR TOUGH AUSTRALIAN CONDITIONS

The Hayes Spraying sliding tank frame for the John Deere 8R 2011 series tractors is designed to accommodate the tractors longer chassis & bonnet design.

The sliding mechanism allows the tank to be positioned closer to the tractor when working and then slide forward when maintaining the tractor.

It is strongly recommended that this option be added to the tank frame to bring the centre of gravity closer to the tractor when working. This will lead to a reduction of the leverage on the tractor chassis thereby decreasing the weight & stress.

AVAILABLE FROM

Hayes Spraying
ABN 54 011 061 260
1 Troy Drive
PO Box 515

SLIDING TANK FRAME FOR JOHN DEERE 8R 2011

HYDRAULIC DRIVEN CENTRIFUGAL HIGH VOLUME HYPRO PUMPS

are fitted to the tank frame with stainless fittings & brass ball valves. The optional upgrade to a stainless steel Hypro pump is available & is recommended especially for use with fertiliser application.

HIGH QUALITY CHEMICAL PROOF HOSES

are used for plumbing allowing for a long life.

SELF FIT KITS

Front tanks are available for self installation with or without the tractor chassis.

SINGLE BALL VALVE & CONTROL

Fitting a single ball valve & control to the tractor allows for the front tank to be used with fertiliser injection or shielded spraying.

FRONT LIGHT BAR

The Front Light Bar allows work lights to be fitted.

FILTERS, CLEAN WATER CONTAINER & EASY ACCESS

Features include a non slip step, hand rail & platform allowing for easy access to the tank.

The plumbing has been designed with an isolation tap to allow for the filters, pump & lines to be rinsed clean.

The clean water container is located near the pump for easy access.

LOW PROFILE & FULLY DRAINABLE TANKS

The use of low profile tanks allows for the best forward vision for the operator.

The tanks are manufactured from UV stabilised polyethylene specifically formulated for chemical use.

The smooth interior and integral sump enables complete decontamination & full drainage.

All tanks are guaranteed by Rapid Spray warranty cover.
